PRYGENIX MEP OPENINGS · FOR AUTODESK REVIT

Every opening for your MEP, placed and kept up to date

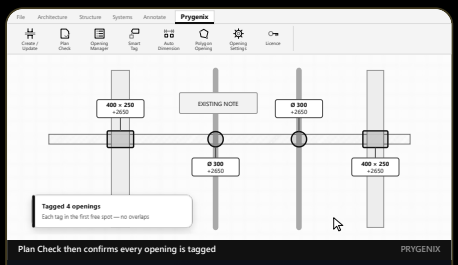

Pick the walls, pick the pipes and ducts — MEP Openings cuts correctly sized openings wherever they pass through. When the services move, run it again: the openings follow, and every change is logged.

✓ Revit 2024 – 2027 ✓ 14-day free trial ✓ Linked & cloud models
✓ BCF round-trip

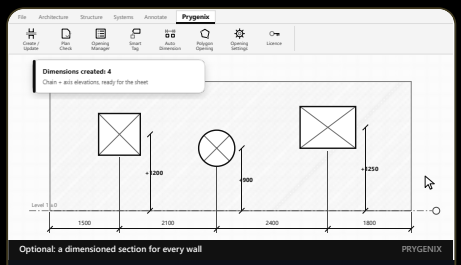

Update after changes
Openings follow the MEP — every change is logged.

Smart Tag
Tags every opening without overlaps.

Auto Dimension
Chain dimensions and axis elevations in one click.

CREATE

✓ **Create & update in one command**
New crossings get openings, moved ones are updated in place, unused ones are flagged.

✓ **Right shape, right size**
Rectangular or circular, clearance per MEP type, rounding, minimum sizes and joining.

✓ **Linked models welcome**
MEP in the model or in links, with fittings, accessories, insulation and fabrication parts.

✓ **Opening Settings**
Clearances per MEP type, hosts to cut, shape and join rules, levels and parameter names in one window.

COORDINATE

✓ **Plan Check**
Openings up to date, changed, no longer needed or missing — and untagged ones — in one report.

✓ **Opening Manager**
Every opening with its status, approvals, comments, clash checks and a full changelog.

✓ **BCF, Excel & HTML**
Review in Navisworks, BIMcollab or Solibri and read the answers back; Excel and HTML reports.

DOCUMENT

✓ **Smart Tag**
Tags every untagged opening and finds a free spot, so tags never overlap.

✓ **Auto Dimension**
Chain dimensions to opening centres, axis elevations to the level, optional sections per wall.

✓ **Polygon openings & shafts**
Click the corners of any shape, or create one shaft through several levels.

✓ **Native opening families**
Rectangular, circular and polygon voids with the parameters needed for tags and schedules.

6
host types: walls, floors, beams, roofs, columns, ceilings

4
MEP types: pipes, ducts, cable trays, conduits

8
commands on the Prygenix tab

14
day trial of every feature

Native Revit content
Everything created is ordinary Revit content — your model works without the add-in.

Safe to use
Changes are reviewed before they are written, and every action is one Undo away.

Simple licensing
One key per computer, delivered by e-mail, works offline after activation.

Fits your setup
Revit 2024 – 2027 on Windows 10 / 11, with workshared and linked models.

Try MEP Openings free for 14 days

Download, choose your Revit versions and open Revit. No key or card needed. Team licences on request.
